

The logo for the Embedded VISION SUMMIT 2018. The word "embedded" is in a white, lowercase, sans-serif font. Below it, "VISION" is in a large, bold, white, uppercase, sans-serif font, with the letter "O" replaced by a colorful circular graphic divided into eight segments of different colors (yellow, orange, red, purple, blue, green, cyan, and magenta). Below "VISION" is the word "SUMMIT" in a white, uppercase, sans-serif font, and at the bottom is the year "2018" in a white, uppercase, sans-serif font. The background of the logo is a blue gradient with a subtle globe-like pattern.

Leveraging Edge and Cloud for Visual Intelligence Solutions

Salil Raje
Senior Vice President,
Software and IP Products Group
Xilinx

May 22, 2018

- EV architectural trends
- Challenges of hybrid architectures
- What's needed

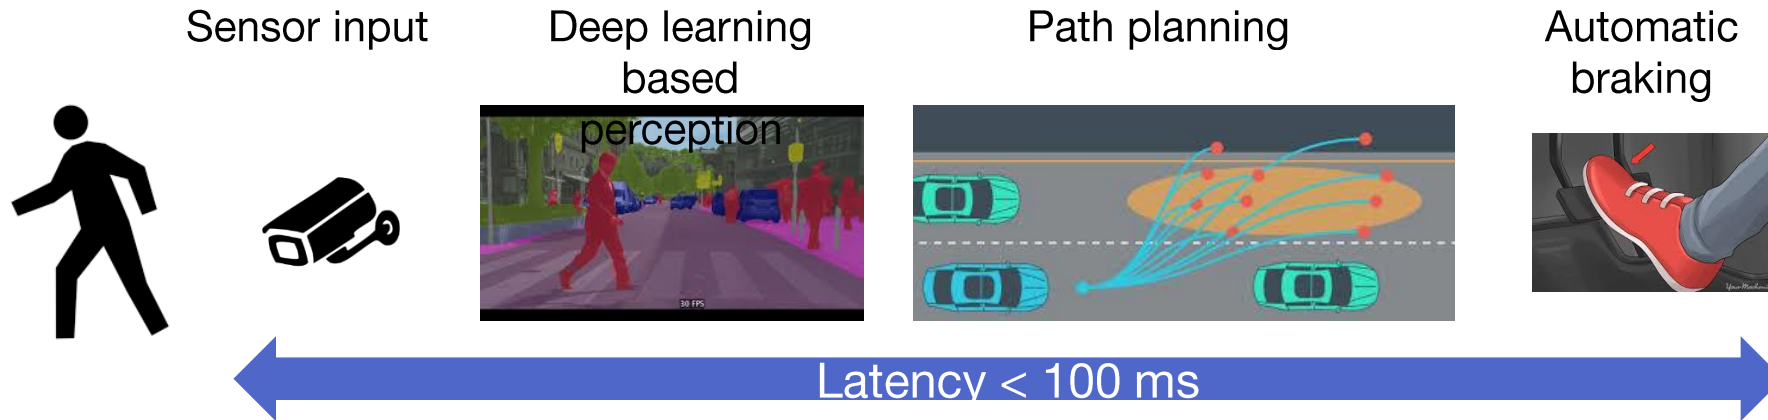

EV Architectural Trends

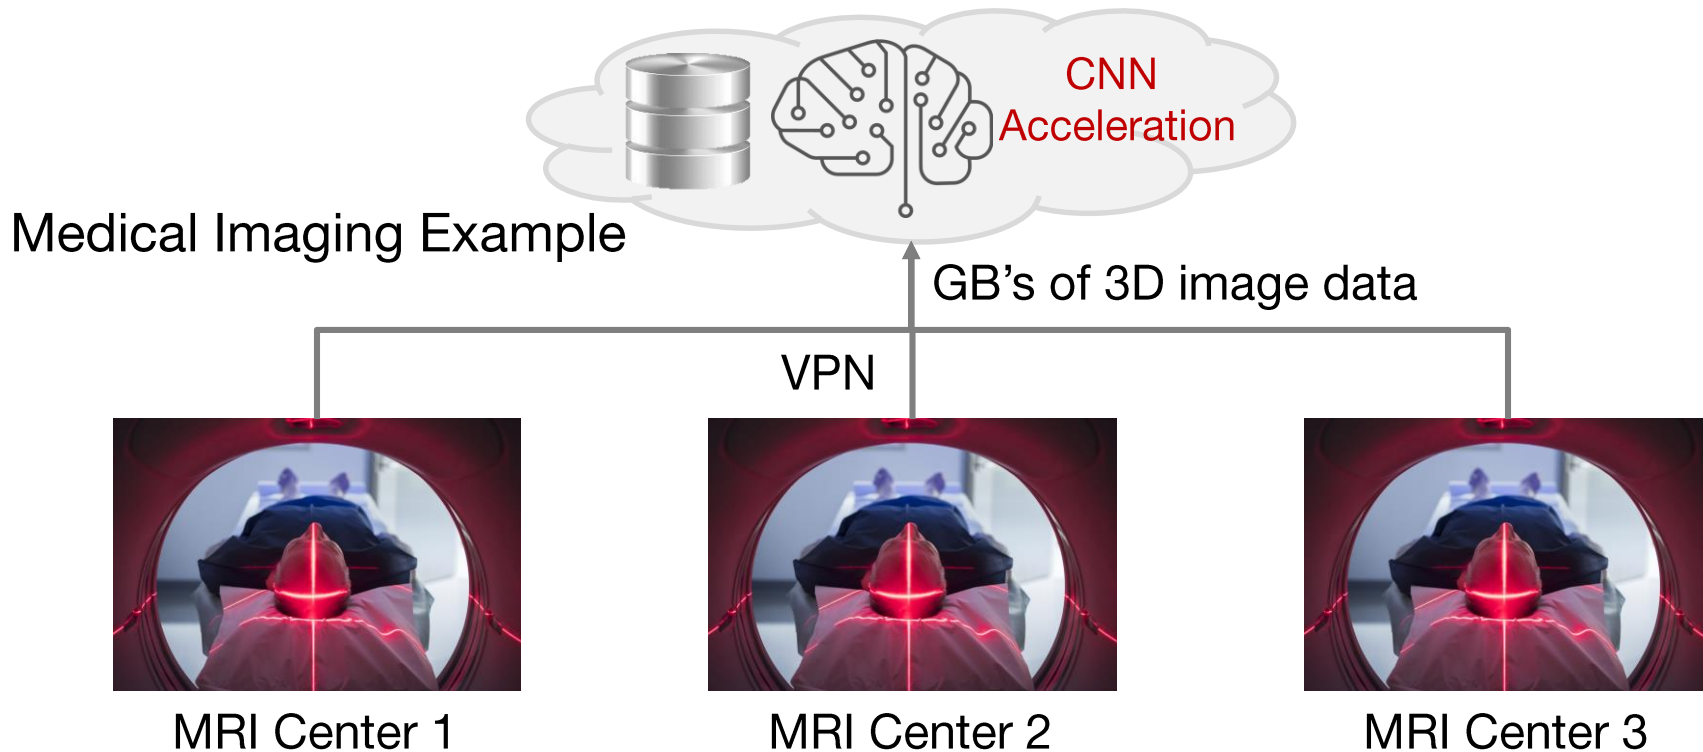

Driver Assistance Example

Power budget: 5W

Cost budget: \$10-\$40

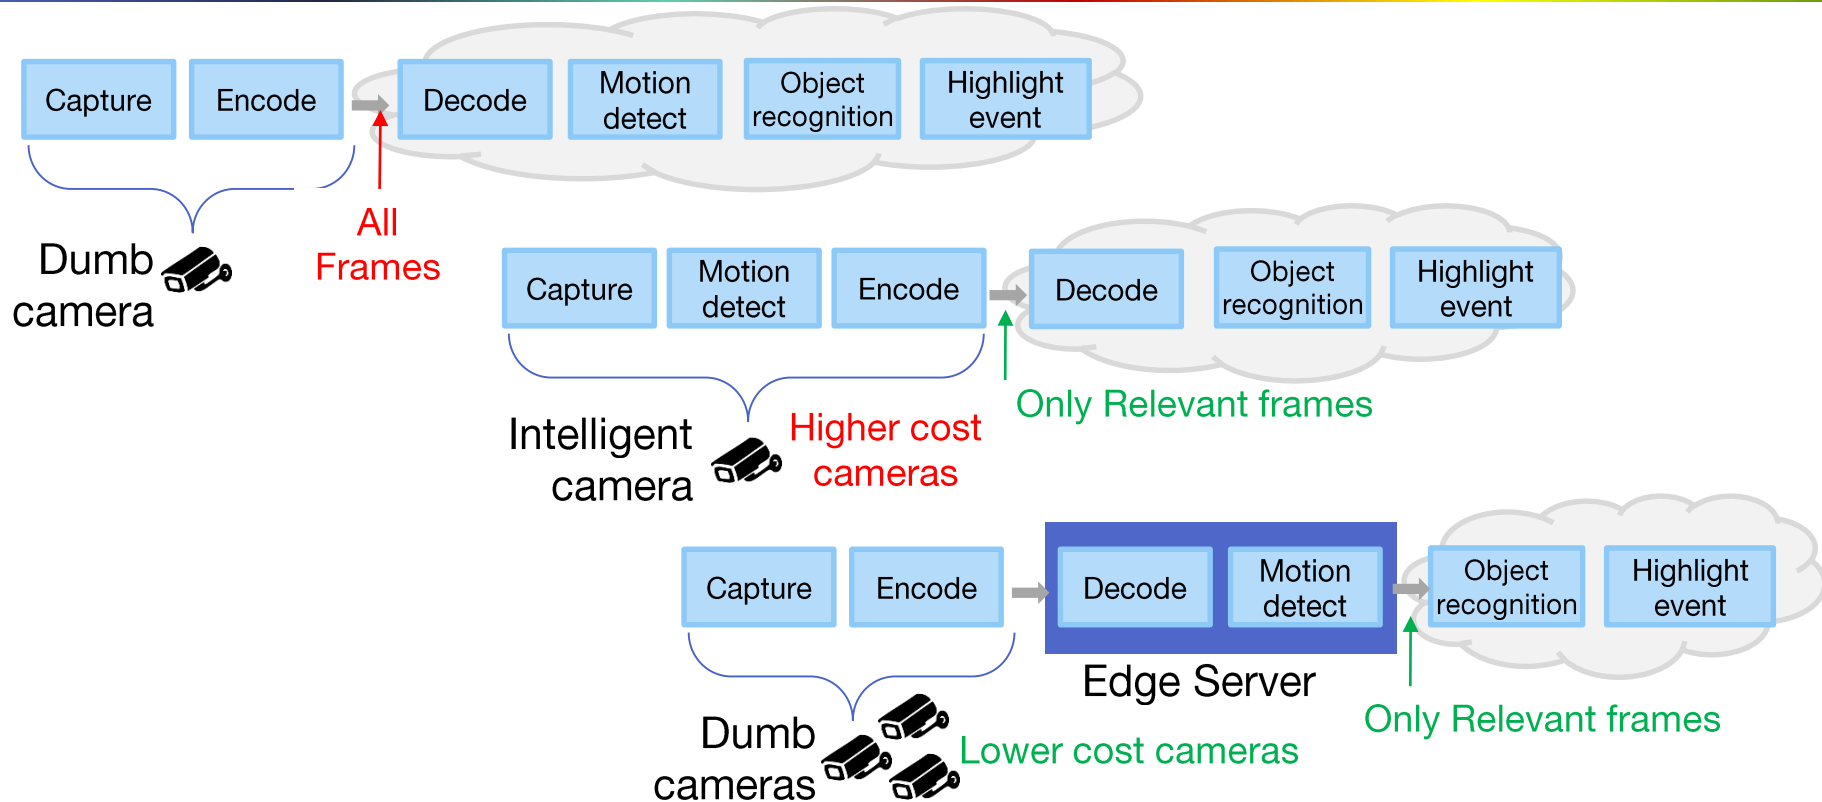

EV Home Security Use Case

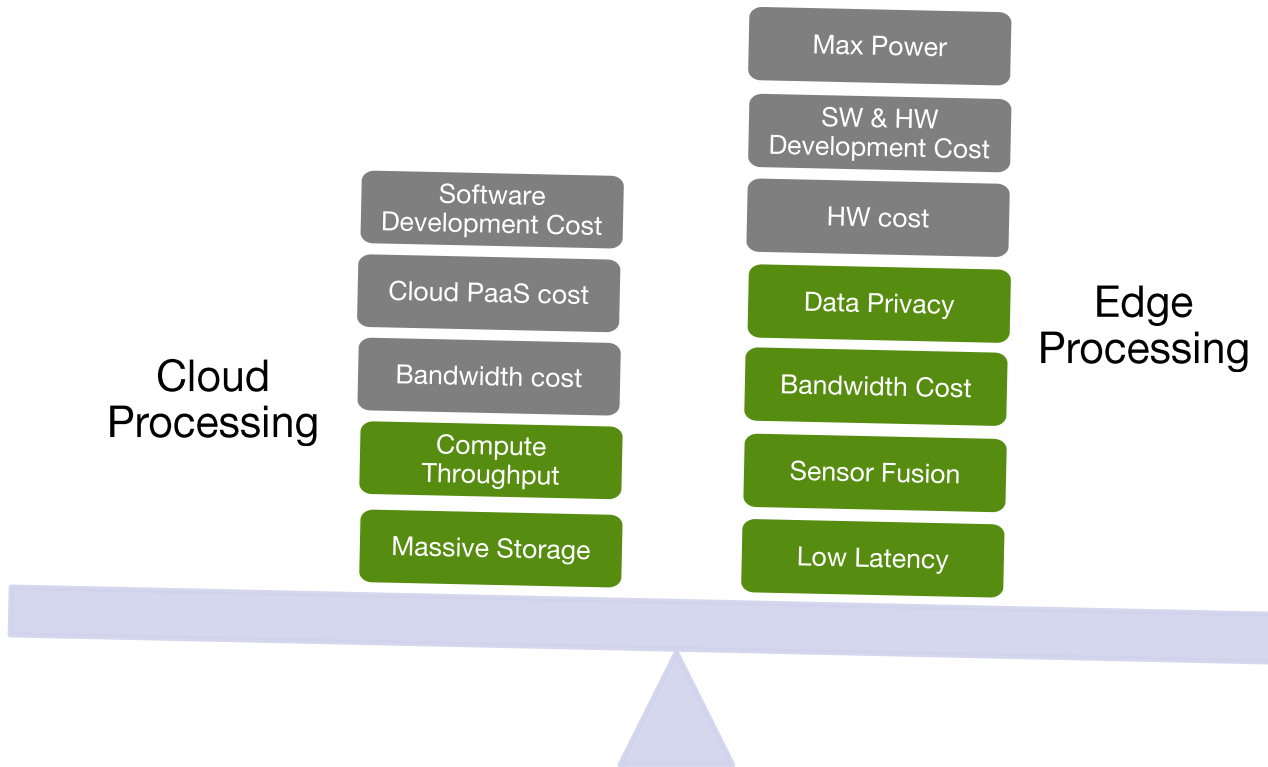

EV Hybrid Architectures for Home Security

Challenges of Hybrid Cloud Architectures

System Partitioning Factors

Diverse Architectures with Multiple SW Stacks

Cloud services: e.g. Google vision API, AWS Rekognition ...

+

Custom accelerators based on: CPUs, GPUs, FPGAs

Edge
Hardware

TI

NXP

nVidia

Ambrella

Hi-Silicon

Xilinx

Development

- Code Composer

- Code Warrior

- Jetson

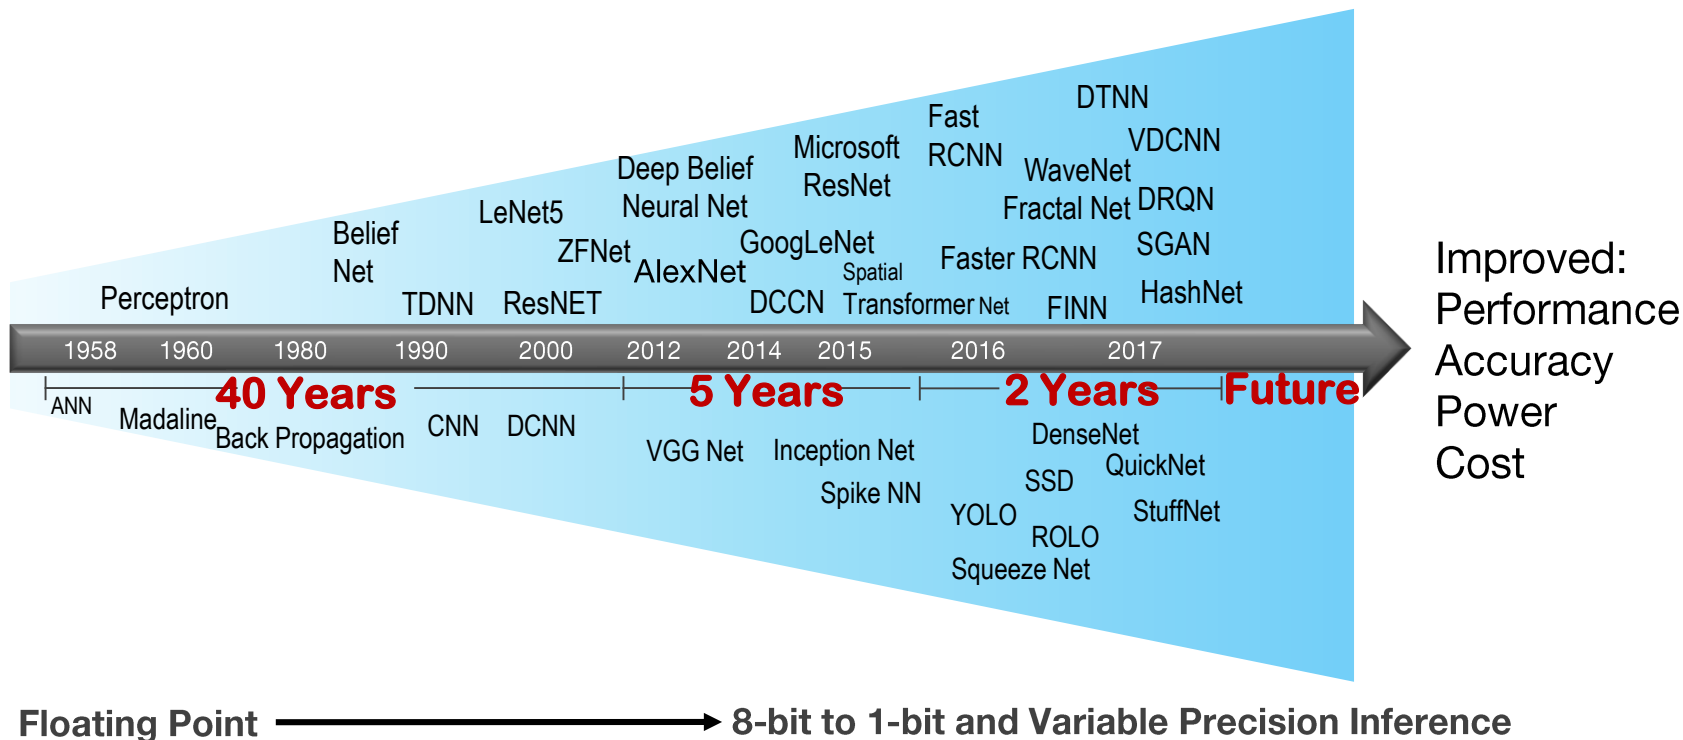

- CVFlow

- Hi-Silicon SDK

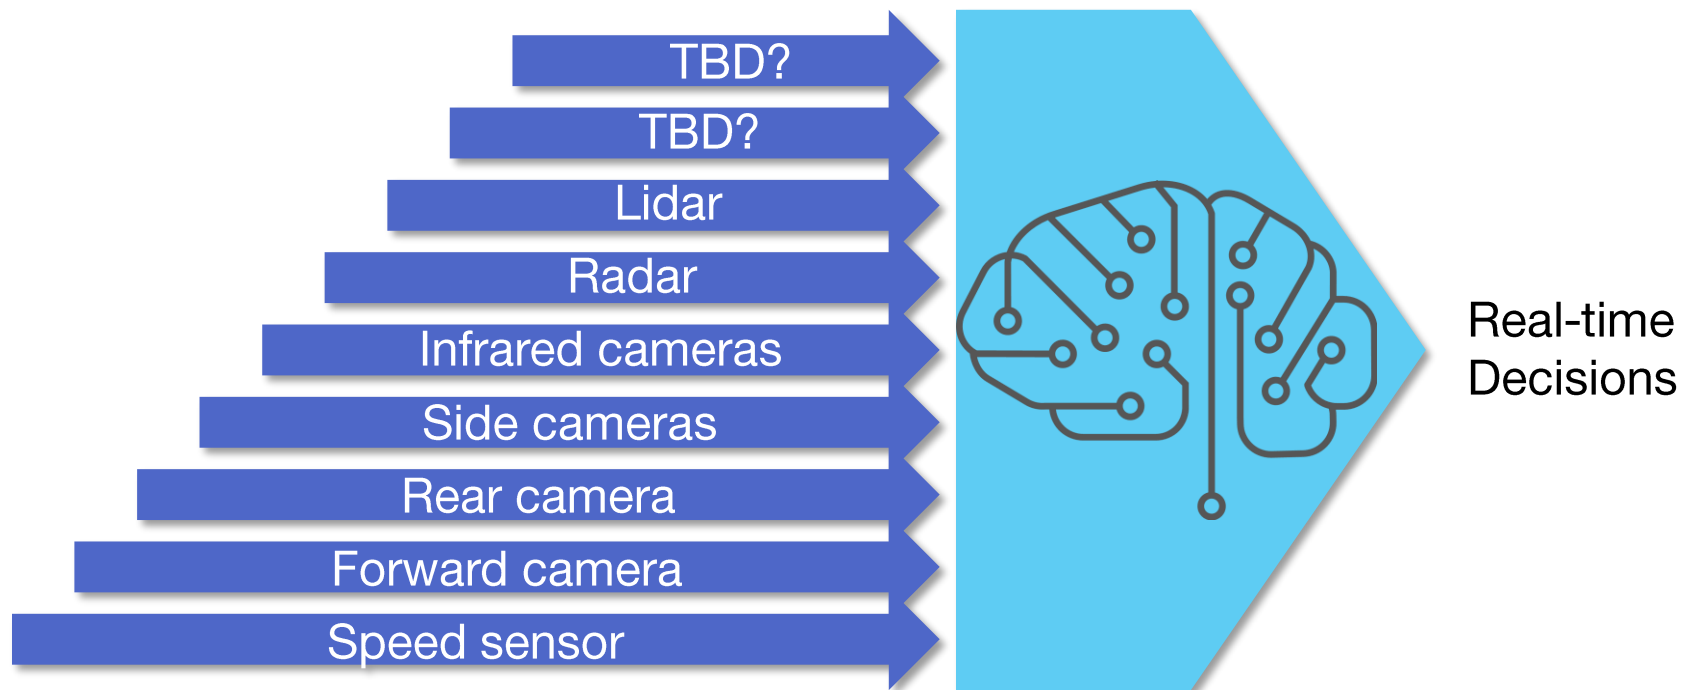

- SDSoC/
reVision

Fixed function ASSPs, GPUs, FPGAs/SoCs

Rate of Neural Network Algorithmic Innovation

Rapid Evolution of Sensor Fusion

What's Needed

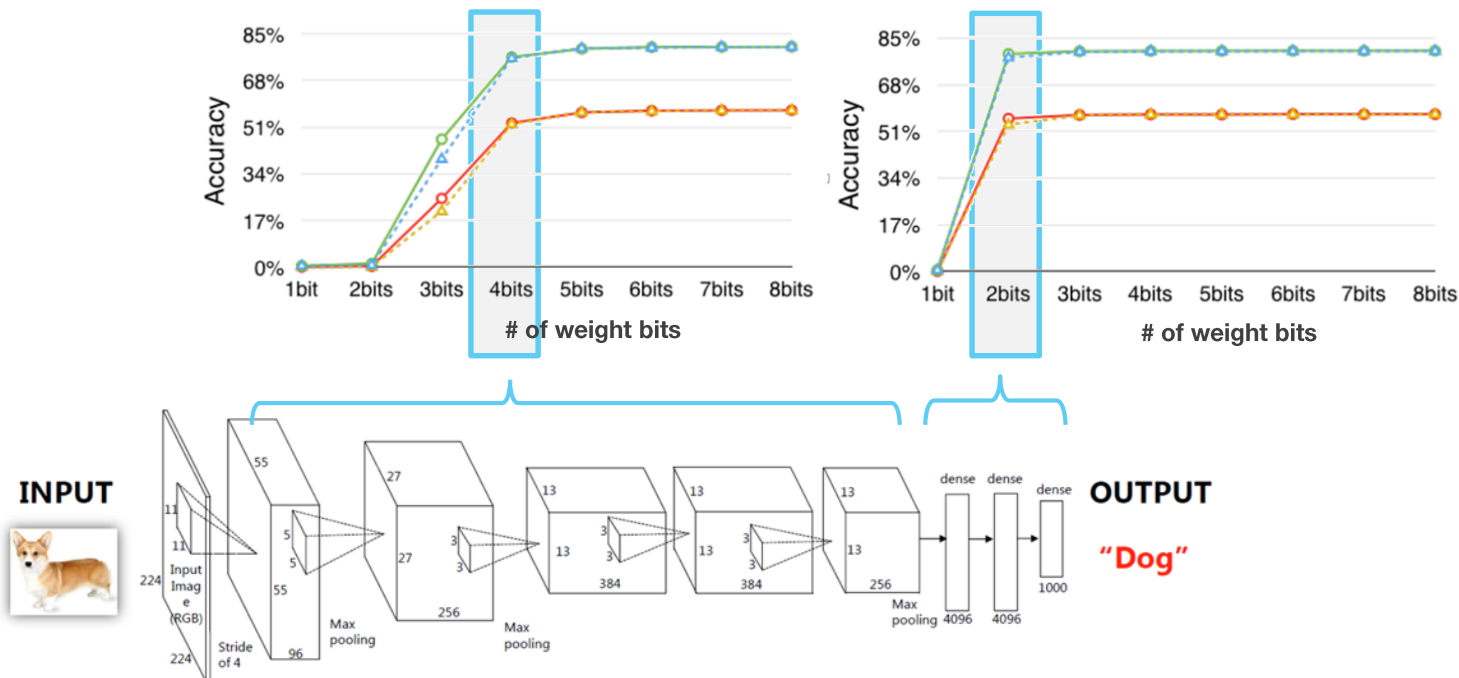

Need Workload Specific Accelerators

- Processor frequency scaling ended in 2005
- Multicore architecture scaling has flattened

- Workloads require higher performance, lower latency
 - Cloud: Transcoding, analytics, AI...
 - Edge: EV, analytics, AI...

Need Variable Precision Inferencing

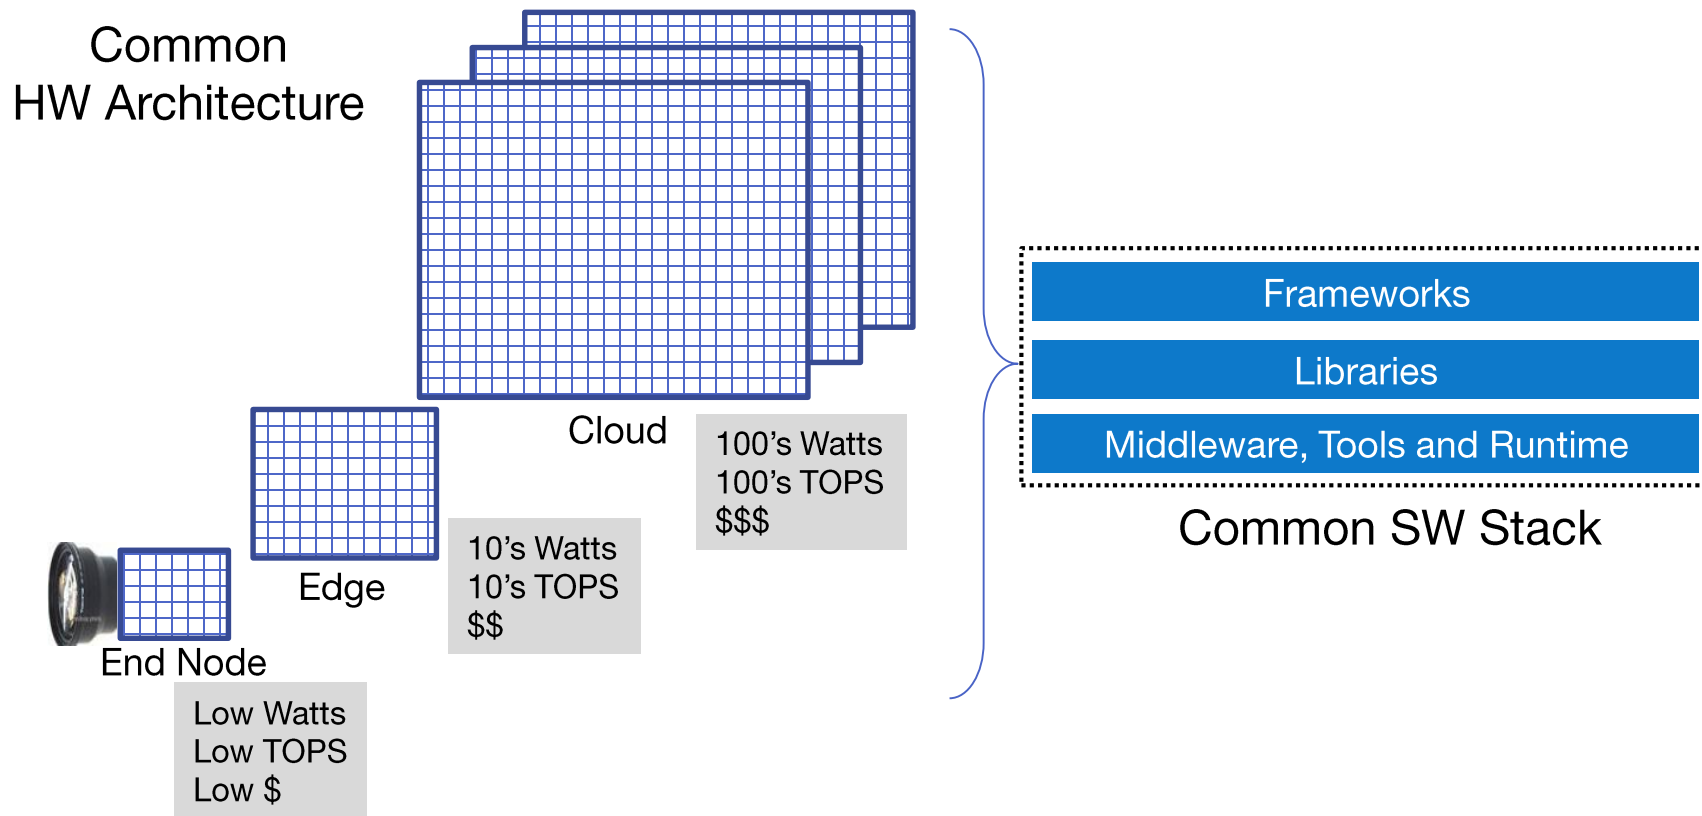

Citation: <https://arxiv.org/pdf/1510.00149.pdf>

Need CNN Pruning & Compression for Best Performance

| | | |
|------------|-------|--------|
| Area | 100% | 15% |
| Error rate | 11.2% | 11.52% |

Need Scalable HW/Unified Software Architecture

Need Better System Modeling Tools

- Increasing trend towards hybrid cloud architectures for EV applications
- Scalable, adaptable HW architecture and unified SW are a must
- Industry standard frameworks and libraries will accelerate growth

About Xilinx and EV

FPGAs and SoCs

Production Boards

FPGA as a Service (FaaS)

EV Development Stack

Xilinx
Offerings

Examples of
EV Applications

- >80 ADAS Models
- >80 ProAV & Broadcast
- >60 Smart Camera
- >50 Industrial Vision

- >10 Medical Diagnostic
- >5 VR/AR
- >5 Drone
